

California Water Quality Monitoring Council

Dear Inland Beach Monitoring Workgroup Members,

Thank you to everyone who participated in our first meeting last week! It was heartening to have so many of you attend and great to meet some of you in person. I'm excited about our next meeting and choosing some projects to focus on. With that in mind, please take this [Doodle Poll](#) with potential April meeting dates by no later than **Friday, March 15th**. And in the meantime, review the proposed objectives and tasks for our workgroup [HERE](#), provide your input, and start thinking about which tasks you'd like to prioritize.

I also wanted to share the draft [Standard Operating Procedures for Microbial Sample Collection](#) developed by SWAMP and invite your comments and suggestions. Our goal is to finalize this in the next couple weeks. Sorry about the delay getting this out to you, but let me know if you'd like to participate in a subgroup working to finalize this SOP.

As always, please let me know if have questions or ideas!

Alisha Wenzel
